1995

Introduction

For more than seven hundred years there has been a church on the hill at Haslingden, the east Lancashire town which grew first as a busy market before sharing in the textile boom of the 18th and 19th centuries. The church is dedicated to St. James and began life as a parochial chapel-of-ease in the vast parish of Whalley. Indeed, it did not become a parish church in its own right until 1866. We know from the Whalley Coucher Book (Chetham Society, X, 206) that the church existed in 1296, but it has been argued that, in fact, its origins are Anglo-Saxon. (See T. Woodcock, *Haslingden. A Topographical History*, Chetham Society, Third Series, IV, 17-20)

The oldest parts of the present church date from the 16th century. They consist of a low arch at the foot of the tower at the west end of the nave and a stone font which stands nearby. Most of the rest of the of the 16th century building was swept away in the late 1700's. The custom of burial inside the church was very popular at Haslingden and over the years hundreds of bodies must have been interred beneath the floor. Eventually this became too much for the old building and an entry in the burial register for 17th February 1772 records its dramatic end :-

Mary the D(r) of Rob(t) Ashworth of Sabdin, who had her Grave made near the Pillar w(ch) occasioned the church to fall before She was buried.

The church stood as a ruin until the middle of 1773 when a faculty was granted to rebuild it. The work was completed in 1780, although the 16th century tower remained intact until 1827 when it too was demolished and replaced by the present structure. At the same time, a chancel and vestries were added to the east end. Further alterations were made to the interior in the 1850's and late 1870's.

The Parish Registers are deposited at the Lancashire Record Office (LRO). The two volumes covered by this transcript are PR 3016/1/1 and PR 3016/1/2. Both are bound in brown full calf leather with covers measuring 6 5/8 inches by 13 3/4 inches and folios, where complete, approximately 5 7/8 inches by 13 inches. The first register consists of a jumble of folios bound in no particular order. The folio numbers in italics in the printed register are those of the transcriber. Some of the folios are blank, many are in a poor state of preservation and most have been heavily repaired. The earliest entries date from 1609. There are some undated folios. An attempt has been made to date these from external and internal sources. The first register contains baptisms to 1644, marriages to 1638 and burials to 1653, together with stray folios with marriages 1698 and burials 1678-9. The second register is, in general, in better condition with folios in the correct order except for a few years of marriages and burials which are mixed. It covers baptisms 1657-1683, marriages 1653-1697 and burials 1653-1678.

The present bindings and repairs date from c1947 when the registers were examined by Dr. F. Taylor, Keeper of Manuscripts at the John Rylands Library, at the suggestion of Dr. Bosdin Leech, Treasurer of the L.P.R.S. The repair work was carried out by the Manchester firm of Bramhall & Menzies who considered that 'if the first two (Registers) are to be saved, the sizing of nearly every page is essential.' Some of the 1947 repairs partially obscured a number of entries, but where possible these have been recovered by examining both registers under ultra-violet light. Such readings are indicated in the text by underlining.

The transcript of the entries in the Parish Register (PR) has been collated with the Bishops Transcripts (BTs), which are also at the LRO. They exist for the following years : 1603,1608,1610,1616,1622,1624,1625(fragment), 1627,1629-1638, 1640-1, 1663-1675, 1677,

1679-1681, 1683-1687 and 1689-1698. Although several folios in the first register have been dated by comparison with the BTs, a number have had to be dated from external sources. These include wills, marriage bonds, visitation records and the court rolls of the manor of Accrington. A few folios cannot be dated exactly, but an approximate date has been allotted and where possible they have been inserted in the main sequence together with an editorial note.

The earliest folios in the first register have baptisms, churchings, marriages and burials mixed together and sometimes not enough of an entry has remained to determine which event is recorded. For this reason a combined transcript of these folios has been produced up to 1624 after which date the PR entries are divided into three categories. Until 1617 or 1618 the names of women 'churched' following childbirth were included in the PR but not in the BT. These entries are indicated in the original PR and the transcript by the abbreviation 'pur'. Also until about 1617/8 and again for burials in 1648-50 and 1659 the PR records the fees for these events. For example, 10d for an adult burial, 2d for the burial of a child, 5d for a churching and 8d for a wedding.

Lists of churchwardens appear at various places in the PR and BTs. Usually six wardens were chosen each year because the chapelry included not only the township of Haslingden, but also the townships of Higher Booths and Lower Booths in the Forest of Rossendale. One warden served for each of the Rossendale townships as well as one for each of the four divisions or 'posts' of Haslingden township. These were Church Post, Town Post, Holden Post and Grane Post. The lists of churchwardens and ministers have been collected together and placed at the end of the text.

Superscript in the original document such as 'x^d' has been transcribed as 'x(d)' and abbreviations such as 'Fento' have been transcribed as 'Fento(n)'. Phrases such as "John Haworth ch bap" have been indexed as 'John Haworth' for it is not certain whether John Haworth was the child or if it refers to a child of John Haworth. There is one instance of the child being female so the entry 'ch' probably refers to 'his child'. A phrase such as 'John Haworth als Smith son of Henry & Ellen' appears to be John the illegitimate son of Henry Haworth and Ellen Smith and has been indexed as such. If the date is not known but is 'the same day' in the PR then this is indicated by 'same' in the date column. Fees on the left edge of the PR have been placed on the right for clarity. Where there has been a phrase in the BT entry but not in the PR it has been transcribed as , for example [Bentlanes (not in PR)] and where there are two copies of BTs for the same period they have been labelled BT and BTb.

It is my happy duty to thank the people who have helped me while working on the Haslingden Registers. I am very grateful indeed to Mr. Thomas Woodcock, Somerset Herald, for the financial assistance which allowed me to undertake the transcriptions of the registers in the first place. I would also like to thank Mrs. Anna Hardman of the LRO for giving a second opinion on some of the more illegible entries, to Dr. Milton Ormerod for help in dating some of the folios and to Dr. John Perkins who prepared the transcript for indexing and who helped to date some of the folios. Finally my thanks are also due to Dr. Colin Rogers for patiently answering the many queries which arose while the work was in progress.

V	=	verso
w.	=	wife, wyff(e)
wid	=	widow(e)
(?)	=	uncertain reading

Hon. General Editor's note

The Society is particularly pleased to be able to publish this volume of registers, for two quite different reasons. The confused state of the original had already defeated the ingenuity of earlier transcribers until John Simpson undertook the task of thoroughly sorting out the MSS, and we are very grateful to him for having done so. It is also one of the earliest Lancashire registers remaining unpublished, though the Society's handlist had incorrectly placed the earliest surviving entry five years before the true commencement. Any member who may be inconvenienced by the fact that, for the first twenty-one years, baptisms, marriages and burials are printed together in order of event date, rather than separated, should direct their comments to me, rather than to the transcriber or editor. I believe that, wherever possible, LPRS publications should faithfully reflect the content of the original registers, and in some cases, it is no longer possible to determine whether the entry is a baptism or a burial. Once again, we are grateful to Dr. John Perkins for entering the MS transcription onto a computer, and in such a way that it could be indexed automatically.

The work of the Society in the last twelve months has been assisted by donations from the Lancashire County Council, Miss Penny S. K. Bell, Dr. Paul T. Bispham, Dr. Larry Hibbert, Miss Margaret Singleton, and Mrs Anne Irene Wade, to whom we are very grateful. Without outside sponsorship, our publishing programme would have to be significantly curtailed.

(Next folio undated but probably 1618 . There are two gaps in the PR large enough,
one in 1618 and one in 1621. The rcoriding of fees is present from 1609 to 1617 and
is not recorded late 1618 to 1623 so 1618 is more likely to be the date than 1621)

(About 1/2 inch missing from PR)

 (*Remainder of folio contains marriages beginning Nov 1680*)

(*Folios 11 and 12 in Volume I of the PR were originally a single piece of parchment. They have been bound the wrong way round (probably when the registers were rebound) so that the earlier entries appear on folios 12v and 11v. The entries on Folios 12 and 11 date from 1679, matching the BT for that year. The entries on folios 12v and 11v date from 1678 (September to Februaery) as is shown by the wills of several of the individuals*)

1678 (*no BT*)
